CYBERMEDIA

Cyberspace Exploration & Investigation Platform

CYBERMEDIA provides Law Enforcement & Intelligence Agencies with capabilities to **monitor, search, explore, investigate & analyze** the various dimensions of the cyberspace.

It features automatic ingestion of the cyberspace intelligence into the organization's data lake allowing advanced investigations through **multi-sources correlations and multi-dimensional analytical** capacities such as semantic, relational, temporal, and geospatial analysis.

MODULES

WEBINT
Clear Web Searches

SOCMINT
Social Media & Online Apps Searches

IMINT
Image Searches

DEEP & DARKINT
Leaks, Deep & DarkWeb Searches

AML/CTF
PEP, Sanctions, Crime lists & Watch lists Searches

INFOSEC
Cybersecurity Searches

COLLECTION CAMPAIGN
Various Cyberspaces Consolidation

TACTICAL CRAWLER
Direct Web Data Collection

VIRTUAL HUMINT
Pseudonym engagement

ALERTS MONITORING
Monitoring new search results

AI-DRIVEN INVESTIGATION
AI Suggestions, Semantic Analysis

MULTI-DIMENSIONAL ANALYSIS
Graph, Geospatial, Temporal

Its **Virtual HUMINT** module combined with Euler **Tactical Crawler** provides **secure, covert and stealth** unique crawling capacities.

OBJECTIVES

MONITOR

Public opinion on various subjects, groups and persons of interest.

COMBAT

Influence, interference and misinformation campaigns.

INFILTRATE

Use social engineering to infiltrate the target's digital circle of trust to gather intelligence.

EXPLORE & SEARCH

Conduct comprehensive exploration & search drills across the various dimensions of the cyberspace, including the Web, Deep and Dark Web, Data Leaks, Social Media and Online Apps.

SECURE, STEALTH & COVERT

Browse securely, engage covertly and crawl stealthily detailed information across the cyberspace through our unique Euler Tactical Crawler.

INGEST & CORRELATE

Ingest and store collected cyberspace data offline before it is deleted or altered, and correlate it with other data sources such as Forensics, HUMINT and COMINT and others...

INVESTIGATE & ANALYZE

Enrich cyber investigation cases with multi dimensional analytical capacities covering semantic, relational, geospatial and temporal analysis.

DETECT & IDENTIFY

Identify fake news, activists, influencers, and false profiles, using correlations, pattern recognition and various data science techniques.

NATIVE INTEGRATION OF OUR INTEL PLATFORMS

Our intelligence fusion center INTEGRA & our cyberspace investigation platform CYBERMEDIA can be natively integrated to establish a comprehensive multi-sources national investigation & intelligence fusion center.
