

Discovery
Location Intel System

See where your suspects go. Understand why. **Take action.**

Get real-time geospatial insights — follow up movement patterns, identify hotspots, and get alerts when persons of interest go online or approach sensitive areas.

Live Location Discovery Movement in the moment.

Track, trace, and profile targets with advanced map-based intelligence and AI-powered analysis.

- ✓ IMSI, IMEI, or Cell ID tracking.
- ✓ Common locations and potential meeting points.
- ✓ Azimuth, timeline and movement analysis in real time.

Real Time Monitoring Ready for the Field.

Optimised for mobile devices and tablets, set alerts from anywhere, empowering field agents and tactical teams.

- ✓ View cases and monitor trackers.
- ✓ Respond to emergencies on the move.
- ✓ Work in parallel with last-mile solutions.

AI Insights & Automation Let AI help you.

Automate tracking with intelligent alerts and suggestions.

- ✓ Set rules to trigger alerts and receive notifications when behavioural changes occur.
- ✓ Correlate findings from multiple data points.
- ✓ Reduce manual work with AI alerts.
- ✓ Export reports to PDF or CSV files

Geofencing & Proximity Alerts Know when it matters.

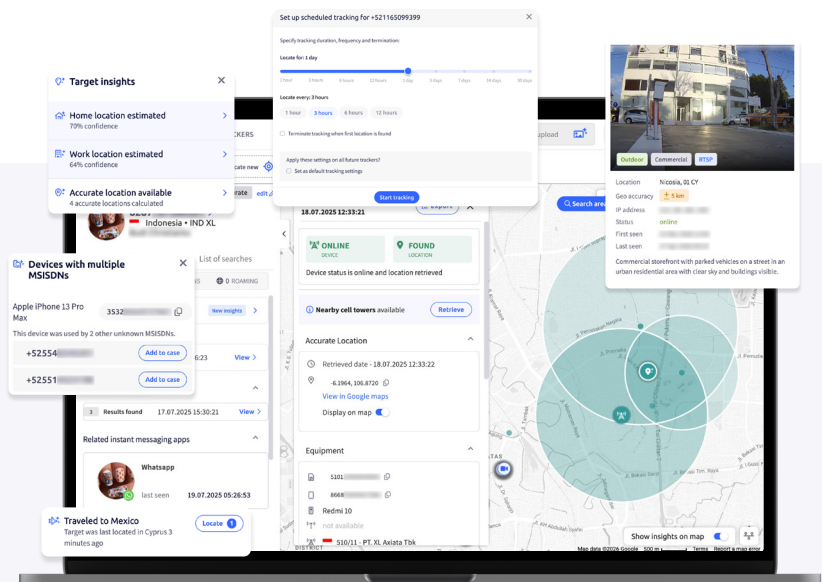

Define zones and get instant alerts when suspects enter, exit, or move near one another.

- ✓ Individual geofences or multi-target proximity alerts.
- ✓ Monitor activity across known hotspots or restricted zones.
- ✓ Spot repeated meetings and shared movement patterns.

Historical Analysis Understand the past. Anticipate what's next.

Build behavioural timelines and movement profiles.

- ✓ Build a full movement history across timeframes.
- ✓ Identify habits, schedules, and common locations.
- ✓ Use trends to anticipate future activity or risks.
