

ENIGMA

Public Sector & Regulators Investigation Platform

ENIGMA supports **Governmental agencies & Regulators** in their investigations by leveraging **multi-source correlations**, **enhanced due diligence**, **cyberspace profiling**, and **advanced transactions analysis**.

ENIGMA enhances operational efficiency through **advanced case management** system, facilitating **secure collaboration** across investigative teams and departments.

Powered by disruptive AI and graph technologies, ENIGMA ingests and correlates internal & external sources of the organization and Cyberspace data to uncover complex hidden patterns and generate actionable insights.

ENIGMA empowers these agencies in investigating potential infringements against public interest by tracing the sequence of events and profiling the entities involved, through semantic, relational, temporal, and geospatial analysis.

Use Cases
