

Gravity

Advanced AI Customised Tools

On-premise customised ingestion tools: Local networks & tactical version

Enables you to connect local networks, data streams to ingest customised data and deploy advanced investigations. The system is a unique artificial intelligence engine that has the ability to run AI algorithms that elevate the connected resources and reveal real time hidden information.

Driven by analysts — Powered by AI.

Run On-Premise

Operate fully on your premises, with a sophisticated hardened engine at no risk. The tactical version utilises a tactical system as a replacement for local networks.

Ingest from Connected Networks and Data Sources: Ingest real-time identifiers, metadata, and activities.

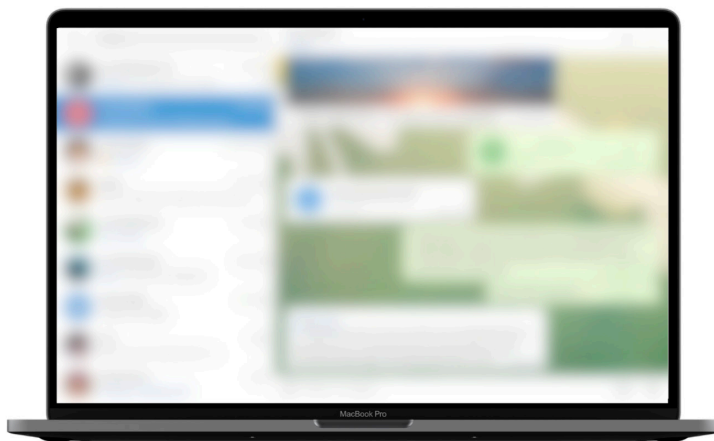

Analyse User Activity

See user patterns, specific activities and all relationships through advanced AI algorithms.

Stay Fully Secure

Maintain full control with isolated, self-contained, and leakproof infrastructure.

Securing Better Lives

Completely invisible. Fully independent. 100% secure.
Deploy customised AI advanced customised tools to support high-stakes operations with precision and discretion. Use reliable solutions when every move matters to uncover threats and act with confidence.
