DATASHEET

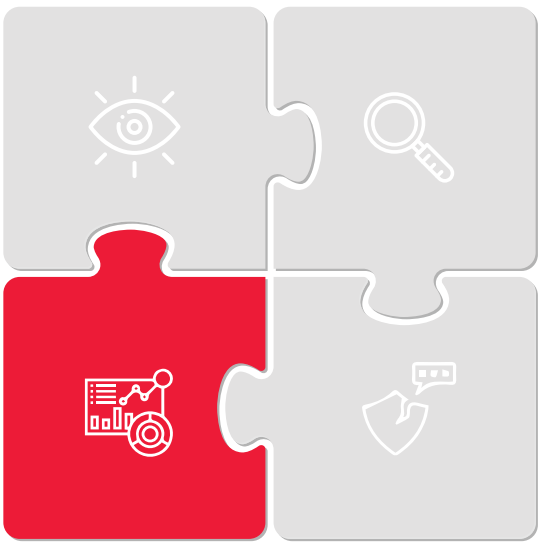
KELA

THREAT LANDSCAPE

Stay ahead of threats with KELA's intelligence insights

OVERVIEW

KELA's Threat Landscape module offers decision-makers high-level intelligence on the ever-changing cybercrime ecosystem, including dashboards of top trends, daily highlights, and finished intelligence feed by KELA's cyber intelligence experts. It includes ransomware events, network access on sale, leaked databases, and new threats across all sectors to deliver high-level executives with effective, strategic information, thus enabling informed decisions on the next steps.



HOW IT WORKS

Extensive Source Collection

KELA automatically and continuously collects intelligence from various hard-to-reach sources, including cybercrime forums and illicit markets, closed instant messaging channels, hacking repositories, and other cybercrime sources. The mass data collected comprised hundreds of thousands of data pieces such as posts and chatters and includes text, images, and other meta-data.

Deep Analysis

Once automatically processed into a structured, readable format, the collected data is reviewed and analyzed by KELA's Cyber Intelligence Center to identify any potential threats, trends, or patterns of suspicious activity.

Strategic Data Made Accessible

KELA's Threat Landscape module includes intuitive and interactive dashboards allowing executives to deliver high-level, finished intelligence reports with practical, strategic information, thus enabling informed decisions on the next steps.

3 SEGMENTS

COVERING EVERYTHING YOU NEED TO KNOW ABOUT THE CYBERCRIME ECOSYSTEM

Trends

Gain valuable insights into the latest cybercrime trends with our user-friendly dashboards. Our dashboards offer a comprehensive overview of APT (Advanced Persistent Threat) activity, ransomware events, and network accesses available for sale. You can easily view top threat actors, affected sectors, and geographic locations. Additionally, our dashboards provide detailed insights over a specific period of time.

Daily Highlights

Discover the latest happenings on the cybercrime underground with KELA's finished intelligence. This segment provides detailed insights into events that have occurred over the past 24 hours. You can stay informed about each event and gain a better understanding of the evolving cyber threat landscape.

Intelligence feed

Stay ahead of cyber threats with KELA's comprehensive finished intelligence feed. Our feed includes detailed information about a range of cybercrime events, including ransomware attacks, network accesses for sale, leaked databases, and emerging threats. You can also access intelligence insights and reports about the latest trends in the cybercrime underground. With our user-friendly interface, you can easily filter the data by date, sector, geographic location, TLP (Traffic Light Protocol), or category, allowing you to focus on what matters most to your organization.

STAY INFORMED ABOUT THE EVOLVING CYBERCRIME LANDSCAPE

Up-to-date intelligence

Stay ahead of cyber threats by staying informed about the latest trends in the cybercrime underground. Our Threat Landscape provides you with valuable insights and analysis to help you better understand how attackers operate, so you can be one step ahead of potential threats.

Situational Awareness

Increase your exposure to real-time intelligence to enhance your organization's situational awareness of potential threats.

Easy consumption

The Threat Landscape module provides high-level executives with a simple and accessible way to consume information and insights on a daily basis. You can use segmentation to present the data divided into categories such as geography, sectors, or threat actors.
